2. Forecast for the Fiscal Year Ending March 2007 (April 1, 2006 - March 31, 2007)

| | Net sales | Recurring profit | Net income |
|-----------|-------------|------------------|-------------|
| | million yen | million yen | million yen |
| Full year | 11,413 | 2,034 | 1,234 |

Note: Estimated net income per share for the full year: 54.11 yen

The above-stated forecast of operating results is based on information available to management at the time this report was prepared. As such, these projections entail risks and uncertainties. Readers should be aware that actual results and events may differ substantially from these projections. The above forecasts are based on assumptions and other relevant factors discussed in the section on Supplementary Information (Page 8).

1. Corporate Group

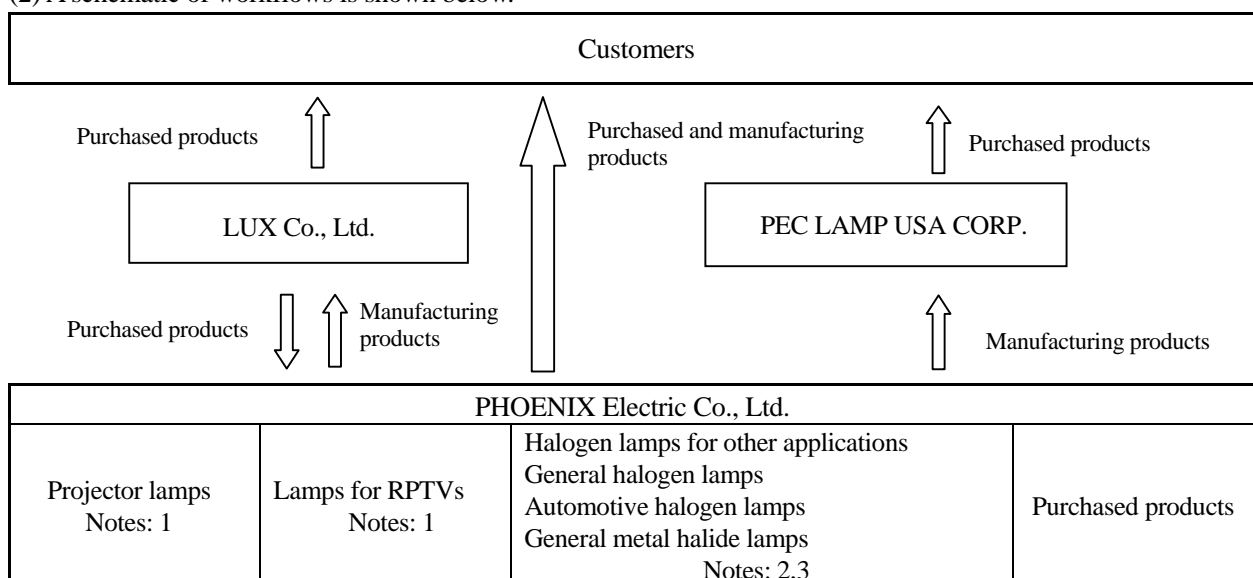

The PHOENIX Electric Group (the Group) is made up of PHOENIX Electric Co., Ltd., the parent company (the Company) and two subsidiaries. The Group is engaged primarily in the manufacture and sale of lamps for projectors, large-screen rear projection televisions (hereafter “lamps for RPTVs”), and other halogen lamps such as general halogen lamps, automotive halogen lamps and general metal halide lamps.

(1) Business activities of group companies are as follows.

| Company | Location | Major activities |
|----------------------------|------------------|--|
| PHOENIX Electric Co., Ltd. | Hyogo Prefecture | Manufacture and sale of lamps for projectors, lamps for RPTVs, other halogen lamps and other products |
| LUX Co., Ltd. | Hyogo Prefecture | Maintenance service of lamps for lighting fixture in department stores, hotels, etc. |
| PEC LAMP USA CORP. | U.S.A. | Sales of halogen lamps such as general halogen lamps, automotive halogen lamps and general metal halide lamps in North America |

Note: LUX Co., Ltd. and PEC LAMP USA CORP. are both wholly owned consolidated subsidiaries of the Company.

(2) A schematic of workflows is shown below.

Notes: 1. Except for certain short-arc metal halide lamps for projectors, lamps manufactured by the Company are super-high-pressure mercury lamps.

2. Halogen lamp—Conventional incandescent light bulbs are filled with an inert gas such as nitrogen to reduce evaporation, or sublimation, of the tungsten filament. In halogen lamps, halogen is used in addition to an inert gas, reducing lamp size to about 3% of a comparable incandescent light bulb. Other advantages are a longer life and the ability to generate light that is brighter and closer to the color of sunlight.

3. Metal halide lamp—A high-intensity discharge lamp that uses metal halide gases to produce greater brightness (lumens) per watt.

(a) LUX Co., Ltd. purchases halogen lamps and metal halide lamps from the Company for sale to external customers and purchases lamps manufactured by other companies for sale to its customers.

The Company purchases lighting fixtures from LUX Co., Ltd. for sale to external customers as part of its lamp business.

(b) PEC LAMP USA CORP. purchases halogen lamps, general metal halide lamps and projector lamps from the Company for sale to external customers and purchases lamps manufactured by other companies for sale to its customers.

2. Management Policies

1. Fundamental Management Policies

Corporate Vision

The Company's philosophy is that "PHOENIX Electric products are of high quality and meet a variety of demands."

The Company's vision is to be a research-driven organization capable of sustained growth, a company that regards manufacturing as a fine art and strives to be the first choice of customers by supplying original products that have outstanding performance and quality for the benefit of shareholders, employees, suppliers and society.

The reborn PHOENIX Electric wants to develop into a company where every employee is glad that he or she remained or decided to join.

Management Policies

1) Maintain a sound and flexible corporate structure

Build a powerful corporate infrastructure capable of sustaining growth while also having the flexibility required to quickly adapt to change.

2) Conduct management in an organized and open manner

Conduct operations in a highly transparent, organizational and open manner to be a company that is fair and just to shareholders, employees and suppliers and to be a responsible corporate citizen.

3) Conduct streamlined, scientific operations

Based on the theme that "Information is an asset for everyone to use, so everyone should use information to generate profits," the Company has adopted an ERP system and makes substantial investments in data warehouse software and other IT systems. The goal is to make the Company even stronger by conducting streamlined and scientific management practices aimed at reducing inventories, cutting costs, shortening lead times and achieving other improvements.

4) Deliver global-standard performance and quality

Aim to manufacture products that deliver performance and quality that rank among the best in the world for the purpose of increasing OEM sales to customers in the lamp industry, particularly overseas companies.

2. Medium- and Long-term Management Strategies

The core strategy is to upgrade the Company's core competences of developing and manufacturing specialty lamps for projectors as well as rear projection televisions and extending user support. The Company also places priority on taking advantage of its small scale to be of greater assistance to customers. The goal is to become number one in niche markets (lamps for projectors as well as rear projection televisions) where the Company can best leverage its unique competitive strengths. Accordingly, management will continue to concentrate resources in the projector lamp business.

- A unique strategy for competing successfully
- Consistent growth
- A solid base of operations
- A prominent industry stature
- A sophisticated management system
- Unique attributes that competitors cannot match
- Happy shareholders, suppliers and employees
- A solid number-one position among customers

The objective is to become a "true middle-market company."

3. Fundamental Policy Regarding Distribution of Earnings

The Company consistently views the return of earnings to shareholders as one of its highest priorities. Regarding dividends, the Company links dividends to earnings but also takes into consideration the need to retain earnings in order to build a sounder financial position, create a more powerful operating base, fund capital expenditures and new product development programs, and take other actions needed to increase shareholder value.

Based on the outlook for consolidated operating results, the Company plans to pay an ordinary dividend of 5 yen per share for the interim period under review.

4. Important Issues

In the projector market, which is a core market sector for the Group, growth in demand is expected for industrial, education and home projectors. However, there is no doubt that intense price competition in this market will extend to projector lamps, too. Competition is also intense in the television market as manufacturers compete to supply larger screens along with lower prices.

In this environment, the Group will continue to channel resources to carefully chosen business fields and place priority on building a stronger operating base and achieving sustained growth.

PHOENIX Electric Group is dedicated to rewarding all its stakeholders, including shareholders, customers, suppliers, employees, and society. For this purpose, the entire Group will challenge the following issues and, in the challenge, fulfill its social obligations as well as increase corporate value by improving operating results.

- 1) Increase collaboration among sales, technology, manufacturing and procurement divisions to become more cost-competitive
- 2) Develop lamps that meet customer demands for better performance (longer life and superior brightness) and better reliability
- 3) Establish and develop a new business (lamps for exposure equipment)
- 4) Take specific actions to establish a framework based on the newly established “Fundamental Policy for Internal Control Systems”

3. Results of Operations and Financial Position

1. Results of Operations

(1) Overview

During the consolidated interim period under review, Japan's economy continued to grow moderately mainly due to increased capital expenditures in the private sector and a rebound in consumer spending despite concerns over negative impact of higher costs of crude oil and other basic materials on corporate earnings.

Looking overseas, the BRICs countries such as China saw their economies still steadily growing. The U.S. economy also stayed firm despite uncertainties such as those over higher crude oil prices and slower personal consumption.

In this environment, the projector market grew as expected because of robust increase in demand for lower-priced projectors, mainly for industrial and educational use. For the interim period under review, sales of lamps for projectors increased in volume of units sold at such a pace as sales will offset the drop for the second half year ended March 2006, or more precisely, grew 20.0% from the second half year ended March 2006 or 5.7% from the interim period ended September 2005. However, in monetary amounts, sales decreased 10.0% from the interim period ended September 2005 due to decline in selling unit prices.

Sales of lamps for RPTVs increased 32.7% in volume of units sold from the interim period ended September 2005. However in monetary amounts, sales increased 12.5% from the interim period ended September 2005, not so much as in volume of units, due to decline in selling unit prices as heated price competition between RPTVs and plasma TVs in the large-screen TV market.

With regard to earnings, the Company managed cost reduction to maintain marginal profits by improving every production process on one hand. This approach includes not only production line automation, but efforts to raise yield and process productivity, diversify supply sources and use new materials and parts for lower-priced projectors. On the other hand, depreciation expense increased because of the newly invested production lines and also selling and general administrative expenses have increased.

As a result of these factors, consolidated net sales decreased 4.4% to 5,797 million yen and operating income was down 25.0% to 1,139 million yen, compared with the interim period ended September 2005. Recurring profit decreased 27.8% from a year earlier to 1,139 million yen.

(2) Results by business segment

Based on the similarity of its products and how they are manufactured, the Company operates in a single business segment, the lamp business. For this reason, results are presented here by product category.

(thousands of yen, %)

| Product category | Net sales | YoY change | Composition |
|---------------------|-----------|------------|-------------|
| Lamps for projector | 3,595,183 | 90.0 | 62.0 |
| Lamps for RPTVs | 981,435 | 112.5 | 16.9 |
| Other halogen lamps | 679,864 | 118.6 | 11.7 |
| Purchased products | 540,853 | 86.3 | 9.3 |
| Total | 5,797,336 | 95.6 | 100.0 |

Note: 1. The breakdown of "Other halogen lamps" is as follows:

(thousands of yen, %)

| Product sub-category | Amount | YoY change (%) |
|----------------------------|---------|----------------|
| General halogen lamps | 458,266 | 125.8 |
| Automotive halogen lamps | 203,779 | 110.9 |
| General metal halide lamps | 17,818 | 69.6 |
| Total | 679,864 | 118.6 |

(3) Results by geographic segment

Results by geographic segment are not presented because Japan accounts for more than 90% of the total sales and assets of all geographic segments.

2. Financial Position

(1) Cash Flows

The balance of cash and cash equivalents as of September 30, 2006 totaled 3,028,976,000 yen, 396,679,000 yen higher than March 31, 2006, on a consolidation basis.

A summary of cash flows and major components follows.

Operating activities:

While sales of lamps for RPTVs was robust and increased 12.5%, compared with the previous interim period ended September 2005, sales of lamps for projectors decreased 10.0% from the previous interim period in monetary amounts due to decline in selling unit prices despite a 5.7% increase in volume of units sold. As a result, net income before income taxes was 1,126,920,000 yen (1,511,580,000 yen in the previous interim period). Including depreciation and amortization of 370,407,000 yen, an income tax payment of 539,548,000 yen and other components, net cash provided by operating activities was 738,119,000 yen, compared with net cash provided of 466,064,000 yen in the previous interim period.

Investing activities:

Net cash used in investing activities was 57,054,000 yen, compared with net cash used of 1,081,704,000 yen in the previous interim period, mainly due to purchase of development and testing facilities of lamps for exposure equipment.

Financing activities:

Net cash used in financing activities was 281,822,000 yen, compared with net cash used of 317,878,000 yen in the previous interim period. The principal use of cash in financing activities was cash dividends paid, and repayment of borrowings.

A summary of cash flow-related indicators is as follows

| | FY3/05 | | FY3/06 | | FY3/07 |
|--|---------|----------|---------|----------|---------|
| | Interim | Year-end | Interim | Year-end | Interim |
| Shareholders' equity ratio (%) | 68.5 | 68.3 | 75.6 | 75.3 | 79.2 |
| Shareholders' equity ratio at market cap (%) | 316.5 | 335.0 | 281.0 | 204.2 | 139.6 |
| Years of debt amortization (years) | 2.8 | 1.0 | 1.9 | 0.3 | 0.9 |
| Interest coverage ratio (times) | 63.1 | 64.1 | 69.8 | 187.0 | 160.2 |

Shareholders' equity ratio: shareholders' equity/ total assets

Shareholders' equity ratio on a market capitalization basis: market capitalization/ total assets

Years of debt amortization: interest-bearing debt/ operating cash flow

Interest coverage ratio: operating cash flow/ interests paid

* All of the above indicators are calculated using figures from the consolidated financial statements.

* Market capitalization is calculated by multiplying the share price at the end of the period by the number of shares outstanding (net of treasury stock) at the end of the period.

* Operating cash flows refers to "net cash provided by (used in) operating activities" as shown on the cash flows statements. Interest-bearing debt refers to the total of liabilities shown on the balance sheets on which interest is paid.

Interests paid refer to "interests paid" as shown in the cash flows statements.

3. Outlook

Looking forward, Japan's economy is deemed to stay firm as sharp yen appreciation is not so likely any time soon while mixture is observed in performance, varying among industries, from a company to another. Still, it is premature to be overly optimistic because there are uncertainties in the U.S. political development and economic trend as well as Japanese economic situation.

In the projector market, the primary source of demand for the Group's products, the Group expects continued growth in demand, mainly for lower-priced models. By contrast, demand in the market for large-screen television is not expected to grow due to intense competition between plasma TVs and RPTVs. Consequently, further decline in selling unit prices is likely inevitable.

Under these circumstances, the Group will work on increasing sales by solidifying relationships with existing customers as well as acquiring new clients. Another theme is reducing costs by having sales, technology, manufacturing and procurement divisions work more closely together, thereby becoming more price-competitive.

Based on this outlook, the Group is forecasting net sales of 11,413 million yen, recurring profit of 2,034 million yen and net income of 1,234 million yen for the fiscal year ending March 2007. This is basically in line with the Company's initial plan.

As a new business, the Company has been developing exposure equipment and launched this product starting with a few units in the market, which were welcomed with a high reputation. The Company will foster vigorously it to a new mainstay business.

4. Business Risks

Material information regarding business and financial situations that may affect investors' decision as follows.

The discussion of these risks includes forward-looking statements. Such statements are based on the judgments of management as of September 30, 2006.

(1) Business activities and past performance of the PHOENIX Electric Group

The PHOENIX Electric Group is made up of PHOENIX Electric Co., Ltd. and subsidiaries LUX Co., Ltd. and PEC LAMP USA CORP. These companies manufacture and sell projector lamps, lamps for RPTVs, and general and automotive lamps.

Super-high-pressure mercury lamps used mainly as projector lamps and rear projection television lamps accounted for 78.9% of total sales compared with 80.2% one year earlier. Consequently, the Group's operating results are subject to changes in the markets for projectors and rear projection televisions, the primary applications for super-high-pressure mercury lamps.

(2) Reliance on major customers

Sales to major customers in the previous and current interim period are shown in the table below. As these figures show, the Group's operating results are vulnerable to changes in business relationships with InFocus Corporation and other major customers.

Currently the Group maintains a good relationship with these companies, but there is no assurance that these companies will continue to use the Group's products.

(thousands of yen)

| Customers | Interim FY3/06 | | Interim FY3/07 | |
|---------------------|----------------|------|----------------|------|
| | Amount | % | Amount | % |
| InFocus Corporation | 1,484,023 | 27.4 | 1,706,815 | 29.4 |
| TOSHIBA CORPORATION | 1,074,693 | 19.8 | 1,212,822 | 20.9 |
| Sharp Corporation | 870,028 | 16.1 | 895,896 | 15.5 |

Notes: 1. Amounts do not include consumption taxes.

2. The above sales include both direct sales to each major customer and sales to outsourcing firms, trading companies and other companies where sales are essentially equivalent to dealing directly with one of these major customers.

(3) Exchange rate volatility

The Group sells its products to customers in North America, Asian countries and other export markets. Overseas sales were 61.2% of total sales in the previous interim period and 56.8% of total sales in the current interim period.

Most export sales are denominated in U.S. dollars, with some transactions using the euro instead. In addition, the Group purchases some components and finished products from overseas suppliers. Large part of raw materials used to make lamps is procured directly or indirectly from outside Japan.

On a non-consolidated basis, sales denominated in U.S. dollars totaled 28,869,000 dollars in the previous interim period and 25,205,000 dollars in the current interim period. Purchases denominated in U.S. dollars totaled 798,000 dollars in the previous interim period and 1,993,000 dollars in the current interim period. As a result, changes in foreign exchange rates can have an effect on operating results.

(4) New product development competition and decline in prices due to intensifying competition

a) Development competition involving performance

There is intense competition to develop projectors that are smaller and lighter yet produce images that are brighter and sharper. Because of this, the product life cycle is only about one to two years.

The projector market is now expanding beyond the core application of business presentations. New applications include home theaters, education, large-screen rear projection televisions, commercial displays, surveillance monitors and digital cinemas. These applications are generating demands for lamps that are even more efficient, have a higher output and longer life, and carry a lower price. Because of this, there is heated competition among lamp manufacturers.

The Company generates a large percentage of its sales from projector lamps and lamps for RPTVs. The outcome of the current development competition, delays (if any) in development of lamps of projectors/RPTVs and related events can have a significant impact on operating results.

b) Risk of price declines due to intensifying competition

There is currently heated price competition in the market for both projector and lamp for rear projection televisions. This competition is causing the average sales price for lamps to decline as well. If the Company is unable to offset the effect of these price declines by raising sales volume and cutting costs, there may be an impact on operating results.

(5) Risk of potential patent disputes

All projector lamp manufacturers are exposed to the risk of becoming involved in a potential patent dispute. The Company pays very close attention to patents and places importance on patents as a means of protecting its own intellectual property as a defensive measure. Accordingly, the Company acts quickly to apply for and receive patents as required.

When developing new products, the Company exercises extreme care to avoid infringing on patents. Nevertheless, this does not completely eliminate the possibility that the Company could be the target of a patent infringement lawsuit. Depending on the nature and outcome of these disputes, there may be an impact on operating results.

(6) Important assumptions concerning major business activities

Projector lamps and lamps for RPTVs, the core product of the Company, are a type of electrical discharge lamp. To achieve this discharge with maximum ease, lamps incorporate mercury as well as tiny amounts of a radioactive isotope in the fluorescent tube.

The Company has received permission to handle radioactive isotopes based on Article 3 paragraph 1 of the Law of Prevention Radiation Hazards Associated With Radioactive Isotopes, etc.

Laws and regulations prescribe no period of validity or deadline for this permission. However, Article 26 paragraph 1 and paragraph 2 of this law defines reasons for the termination or suspension of this permission.

At present, there are no factors that present a risk involving the continuation of the Company's ability to handle radioactive materials. In the event that an event occurs that results in the termination or suspension of this permission, the Company would have difficulty conducting its core business activities and there may be a substantial impact on operating results.
